Based on the popular Thermo Scientific Nicolet iS5 mid-infrared spectrometer, the Nicolet iS5N FT-NIR spectrometer integrates high-performance optics into a small, rugged package. The spectrometer is perfect for use in a wide range of settings, from small industrial facilities to global manufacturing sites.

The Nicolet iS5N spectrometer withstands hot, humid environments while its user-serviceable components greatly reduce service visits and lower maintenance costs.

## The Nicolet iS5N FT-NIR Spectrometer

- Affordable price
- Superior performance
- Small footprint
- Flexible sampling

## Unique Optical System

The sealed and desiccated optical unit protects the instrument from humidity and solvent vapors. A self-compensating, dynamically aligned interferometer removes any tilt and shear scanning error, automatically tunes the instrument for best throughput and provides analysis speed for real time survey or screening. Pinned-in-place adjustment-free optics guarantee consistent system performance with minimum maintenance.
